

Charcoal oven Metos X1 S/S, grill drawer opening on the left

Metos X-Oven charcoal ovens are designed for the demanding griller - for cooking, where natural flavors are attracted while the structure and texture of the product are made exactly as desired. With the help of the oven, meats, fish, vegetables and seafood are prepared with real charcoal quickly and always in uniform quality. Special attention has been paid to work ergonomics and ease of use in the design of the device. In the Metos X-Oven ovens, the products to be grilled move on top of the pull-out grill drawers. This allows for ergonomic working positions, keeping combustion gases and heat better inside the oven, and helps prevent burns. This X1 model has one drawer that opens to the left of the oven. The oven is intended to be mounted on a stand.

The charcoal oven Metos X-Oven X1 offers a wide range of cooking options; grilling, gratinating, roasting, smoking or frying. By adjusting the smoke outlet valve of the oven, the taste of the food can easily be influenced: closing to get more ember into the chamber, opening it produces more flavor. The quality of coal can also affect the outcome. Neutral charcoal highlights the raw materials own flavors. By adding essences or fragrances to the charcoal, different flavors can be

varied in foods.

When made in a charcoal oven, the hard temperature closes the surface of the food while retaining mineral salts, juiciness, softness and texture.

The controlled process brings out the natural flavors of the food, without fear of surface carbonizing. The air circulation in the closed oven chamber is designed to provide sufficient oxygen to keep the charcoal alive but avoiding the development of uncontrolled flames. In this way, the temperature can be stabilized and the products become uniform. The controlled, energy-efficient combustion process optimizes the use of coal and reduces the generation of waste heat

The charcoal oven is easy, comfortable and safe to use. The grill drawer is insulated from glowing coals and is thus not in direct contact with the heat source. The oven chimney has an integrated fire breaker, which prevents the release of sparks or solid particles into the flue. This allows the charcoal oven to be used both outdoors and indoors.

- a charcoal oven to be mounted on a stand or worktop
- one GN1 / 1 grill drawer, opens to the left
- stainless steel grill 370x540 mm
- charcoal hatch with window and thermometer
- chrome warmer grill
- operating temperature 280/380°C
- recommended amount of charcoals 3 kg, consumption 0.7 kg / hour
- average production rate (300gr. a portion) 60 portions/h

- average service time 4-6 hours (first 3-4 hours maximum heat intensity, last 1-2 hours declining)

- fire breaker
- stainless steel construction

DELIVERY INCLUDES:

- grill drawer 150 mm
- grill brush
- fire breaker net filter brush
- fire poker
- heat resistant gloves
- telescopic guides (spare pair)
- food safe grease (250 ml)

ACCESSORIES (to be ordered separately):

- stainless steel open stand
- charcoal 8 kg
- ecological lighter block 20 pcs / bag

Product number	4049968
Product name	Charcoal oven Metos X1 S/S, grill drawer opening on the left
Size (mm) (w * d * h)	585/960 * 840/1240 * 1000
Weight	150,000 KG
Capacity	60 x 300gr. portions/hour
Technical information
