Grey compartment basket Metos with green heightening frame a

Designed especially for washing of glass. Offers excellent protection
for fragile glass during washing, transportation and storage. Color
coding facilitates recognition of glass.
Racks in the work pieces reduce the contact area to the minimum and
prevent the threats from arising. Fits all dishwashers with standard
dimensions.
The material is made of lightly clean and scratch resistant
polypropylene. Even fully loaded, the basket keeps the shape as a result
of its rugged design, it slides easily on surfaces and even on
conveyors.
Thanks to the design on the bottom of the basket, they are handy to
stack, which eliminates transport and storage of the baskets.
The structure of the double walls still makes the basket without
unnecessary extra weight.
The diagonally placed handles offer a steady lifting grip and support
for the carrying, with little muscle strength.
The smooth walls make it impossible for laundry and dirt to accumulate
in the structure of the basket. The open bottom structure makes the
water feasible. Because of this, the water jet can easily reach the
vessels and the dirt water do not accumulate in the structure of the
basket.

Product number	4550060
Product name	Grey compartment basket Metos with green heightening frame a
Size (mm) (w * d * h)	500 * 500 * 256
Weight	0,000
Capacity	64 pcs. Ø52 x 220 mm glass
Technical information
