

Black compartment basket Metos with black heightening frame

Designed especially for washing of glass. Offers excellent protection for fragile glass during washing, transportation and storage. Color

coding facilitates recognition of glass.

Racks in the work pieces reduce the contact area to the minimum and

prevent the threats from arising. Fits all dishwashers with standard dimensions.

The material is made of lightly clean and scratch resistant

polypropylene. Even fully loaded, the basket keeps the shape as a result

of its rugged design, it slides easily on surfaces and even on conveyors.

Thanks to the design on the bottom of the basket, they are handy to

stack, which eliminates transport and storage of the baskets.

The structure of the double walls still makes the basket without

unnecessary extra weight.

The diagonally placed handles offer a steady lifting grip and support

for the carrying, with little muscle strength.

The smooth walls make it impossible for laundry and dirt to accumulate

in the structure of the basket. The open bottom structure makes the

water feasible. Because of this, the water jet can easily reach the

vessels and the dirt water do not accumulate in the structure of the basket.

Product number	4550360
Product name	Black compartment basket Metos with black heightening frame
Size (mm) (w * d * h)	500 * 500 * 256
Weight	0,000 KG
Capacity	64 pcs. Ø52 x 220 mm glass
Technical information
